

ACTION & IMPACT

Your support for Partners In Health has deep and measurable impact.

Our global work to improve health care in marginalized communities is possible because of you.

The data on these pages demonstrate how your generosity

last year enabled us to deliver transformative care to patients around the world. Our nearly 19,000 staff are accompanying patients daily, providing expert medical care across hundreds of PIH facilities, and responding to

infectious disease outbreaks, all while working with local and national governments to improve the health care policy.

Thank you for partnering with us in this ongoing fight for a more just and healthy world.

2.9 million outpatient visits

Whether patients need prenatal care, treatment for a chronic condition like diabetes, or support navigating an HIV diagnosis, they can access compassionate care for a wide range of conditions at PIH-supported facilities.

845,600 home visits

PIH's network of **10,730 community health workers** brings quality care and support directly to patients and their families at home.

557,000 COVID-19 screenings

As COVID-19 continued to threaten lives and livelihoods throughout 2022, PIH staff maintained extensive screening programs to prevent the spread of COVID-19 and keep the communities we serve safe.

VOICES of PARTNERS IN HEALTH

"Across our 11 sites, we are deeply committed to improving access to health services for people in underserved communities.

We also believe that ending the vicious cycle of poverty extends beyond medical care, as it includes tackling the socio-economic challenges that perpetuate it. In countries like Malawi, PIH offers short- and long-term social support by providing patients with basic resources like food and housing and covers school fees and other related costs that help widen access to education. We're optimistic for the future, because we know we are not doing this alone. With your trusted partnership, we will continue to deliver timely care to those who need it most."

DR. LUCKSON DULLIE
Executive Director,
Abwenzi Pa Za Umoyo
(PIH Malawi)

3,000 TB patients completed full course of treatment

With access to effective treatment and support, people with tuberculosis can be cured; this deadly, airborne disease can be stopped before spreading to other members of the community.

2,700 in 2020

35,200 chronic disease patients currently in care

PIH continues to provide a global model for chronic disease treatment in settings of poverty. We show the world how to care for patients with conditions like heart disease, diabetes, and asthma in communities where treatment was once non-existent.

3,300 cancer patients currently in care

As the number of detected cancer cases rises in impoverished countries, PIH's work to provide advanced oncology care and prevention is becoming more essential.

10,400 MALNUTRITION PATIENTS CURRENTLY IN CARE

PIH tackles malnutrition through a multipronged approach to alleviate the clinical, economic, and social factors that drive hunger.

18,700 PATIENTS ENROLLED IN MENTAL HEALTH CARE

We're bringing mental health care, awareness, and education to vulnerable communities, while reducing the stigma that discourages patients from seeking care.

32,000 SOCIAL SUPPORT PACKAGES

PIH's social support program helps us treat the whole patient, not just their condition. We provide necessities and resources including food, housing, and financial support for patients and their families so they can feel better and remain healthy.

VOICES of PARTNERS IN HEALTH

"My main objective is to guarantee quality care for women. The Casa

Materna team is grateful for your support because it enables us to collaborate with traditional midwives to accompany women during pregnancy and childbirth. It allows us to accompany women with very deep stories and create a more just world where everyone has the right to access dignified care. In order to improve health outcomes for women, we have to change the way we think about maternal health and well-being."

ADRIANA FABIÁN
Birthing Home Clinical Supervisor,
Compañeros En Salud (PIH Mexico)

"More committed than ever to our mission to provide a preferential option for the underserved." For 14

years, with my PIH colleagues in Haiti, I helped ensure access to quality services for my fellow Haitian citizens. Despite countless barriers, I had the unique opportunity to experience the benefits of pragmatic solidarity and sound partnerships with communities and local governments in the fight against social injustice and its consequences. Today, I am happy to continue this noble mission with my colleagues at PIH Canada and worldwide by contributing to the resource mobilization effort that is fundamental to ensure the sustainability of our life-saving works."

DR. JEAN PAUL JOSEPH
Senior Development Officer,
Partners In Health Canada

A YEAR IN PHOTOS

With you by our side in 2022, we continued to work alongside our partners to create a world in which all patients can access the lifesaving treatment they need. Here is a glimpse of the inspiring work your support made possible:
